# JOE KARLSSON

Principal Developer Marketing Engineer

I run developer marketing for Connect AI, CData's MCP platform that connects AI agents to live enterprise data. Before that I spent about 15 years writing software, teaching it, and explaining it: front-end tech lead at Best Buy, bootcamp instructor in Honolulu, and developer relations at MongoDB, SingleStore, Tinybird, and CloudQuery. So far that's 100+ talks, including a TEDx talk.

## EXPERIENCE

### Principal Developer Marketing Engineer

2026 - Present

**CData** | Remote

`MCP, AI Agents, SQL, REST APIs, SEO, Python`

- Run developer marketing for Connect AI, CData's managed MCP platform that connects AI agents to live enterprise data, and own developer growth end to end
- Own the developer growth engine: technical docs, content, SEO and AEO, and how the platform is positioned to the engineers building on it
- Grow the organic developer adoption already forming around Connect AI
- Work with Product, Engineering, and Docs to keep the developer experience tight and make CData the obvious choice for connecting AI agents to enterprise data
- Build the demos, guides, and content that show developers how to solve their actual problem

### Head of Developer Relations

2024 - 2026

**CloudQuery (now env0)** | Remote

`GCP, AWS, Azure, ClickHouse, Python, SQL`

- Built the Developer Relations function from scratch and ran all of it: content, community, docs, events, and video. Also owned the marketing site, docs, and developer hub, from the first Google result to trial activation
- Grew organic traffic 4x in under 3 months (about 1,350 to 5,600+ visitors a week). 426 keywords reached the top 10, including "cloud governance framework" (11 to 2) and "IT asset management" (43 to 7), and two target keywords hit #1
- Weekly search impressions reached 4.9x the previous all-time high, and trial signups rose 61% during the same push
- Rewrote the docs end to end: Quickstart completions went from zero to 25 a week, docs traffic grew 302%, and docs became a measurable activation channel
- Monthly MQLs hit 239% of target. Organic readers converted to trials and closed deals with no paid touchpoints
- Built a weekly audit that combined Search Console, Ahrefs, Plausible, and HubSpot, so every fix shipped as a tracked PR and I could tell which change moved which page
- Built the marketing team's Claude Code skills repo, which became shared internal tooling for both the CloudQuery and env0 brands, plus AI automations that produce sales one-pagers, discovery decks, and pitch slides
- Published 80+ technical posts on cloud security, IaC, and data engineering, ran a webinar series and the YouTube channel, and spoke at conferences
- Attended daily engineering standups and merged 480+ PRs into production
- After the merger with env0, ran the same content playbook on env0.com: organic traffic up 106% in 3 weeks

### Senior Developer Advocate

2023 - 2024

**Tinybird** | Remote

`SQL, ClickHouse, BigQuery, Kafka, Snowflake, Redshift, Python, GCP, AWS`

- Built custom demos on prospects' own stacks for the Sales team, showing exactly where Tinybird fit their architecture
- Built proofs of concept, including a fraud detection system on GCP, BigQuery, and Kafka (33% fewer fraudulent transactions) and a BigQuery IoT optimization for a trucking company (40% lower compute cost, 30% faster data retrieval)
- Made technical content, videos, webinars, and workshops on real-time analytics for a developer audience
- Built community through workshops, online forums, and conference talks

### Senior Developer Advocate

2021 - 2023

**SingleStore** | Remote

`SQL, MySQL, Go, Node.js`

- Ran content and video for developers moving from MySQL and PostgreSQL: tutorials, conference talks, and demos
- Set up co-marketing with cloud and tooling partners: joint content, webinars, and conference activations with their marketing and DevRel teams
- Ran conference presence end to end, from talk submissions and booth plans to the content afterward
- Worked with Engineering, Docs, and Sales to line content up with launches, keep it technically accurate, and support pre-sales

### Senior Developer Advocate

2019 - 2021

**MongoDB** | Remote

`JavaScript, Node.js, Python, React, MongoDB, AWS`

- Keynoted MongoDB World and ran global conference strategy. When COVID canceled events, I moved the program to Twitch, YouTube, and TikTok
- Grew a 25K+ TikTok following (844K+ likes) and ranked #1 on "10 Must-Follow Developers on TikTok"
- Built demos like an IoT kitty litter box and an IoT digital graffiti board
- Wrote MongoDB's schema design, aggregation, and Atlas guides and videos, published on the MongoDB Developer Hub, The New Stack, and Medium

### Front End Technical Lead

2017 - 2019

**Best Buy** | Minneapolis, MN

`JavaScript, Node.js, React, Redux, Express, AWS`

- Led a team of 10 engineers, QA, and product that owned Account Home on bestbuy.com, one of the top 3 eCommerce sites in North America (millions of users, thousands of requests per second)
- Led the full redesign and rebuild of Account Home with the UX, product, and backend teams
- Built an NLP chatbot that cut customer support call volume 25%

### Full-Stack JavaScript Instructor

2015 - 2017

**DevLeague** | Honolulu, HI

`ES6, JavaScript, Node.js, React, Angular, PostgreSQL, AWS`

- Taught full-stack JavaScript at Hawaii's first web development bootcamp, one of the top 10 coding bootcamps in the world
- Wrote the curriculum for its 12-week courses, led workshops, and mentored students into engineering jobs at local and national companies

## SKILLS

**LANGUAGES**

JavaScript, TypeScript, Python, Go, Swift, SQL

**AI & AGENTS**

MCP Servers, Claude Code (skills, hooks, subagents), AI Agents, LLM APIs, Local Models (whisper.cpp, Ollama), Sales and Content Automation

**DATABASES**

MongoDB, PostgreSQL, MySQL, ClickHouse, Redis, Elasticsearch, SingleStore

**CLOUD & DATA**

AWS, GCP, Azure, BigQuery, Snowflake, Kafka, Airflow

**INFRASTRUCTURE**

Proxmox, OpenTofu, Docker, Linux, Prometheus, Grafana, Home Assistant

**FRONTEND**

React, Redux, Astro, Tailwind CSS, D3.js, Canvas, WebGL

**DEVREL & MARKETING**

Technical Writing, Developer Docs, Conference Speaking, Video, Content Strategy, SEO, AEO, Conversion Optimization, Sales Enablement, Marketing Analytics, Community, Webinars

## EDUCATION

### Bachelor of Arts in Computer Science

2008 - 2012

**Gustavus Adolphus College**

GPA: 3.5 | Minors: Art History, Math
